

MECHANICAL POWER TRANSMISSION

Dodge® local support

Committed to customers in the U.S.

Safety, quality, innovation and customer service are the values we have put into Dodge products for our customers since introducing the Magic Wagon Jack in 1878. We continue to be committed to these same values today so that we can deliver the products and attention you deserve.

The trusted leader in the industry

Dodge offers a complete line of mechanical products, including mounted bearings, enclosed gearing, couplings, pulleys, mechanical drives, and other power transmission components.

Customers have trusted Dodge products to keep their operations running for over 140 years. Decades of experience applying mechanical products throughout a wide range of industries means we understand issues that impact productivity and can offer expertise to help improve output and equipment life.

Committed to safety

To keep your employees and equipment safe, Dodge products are designed and manufactured to be easy to install, run reliably, and require minimal maintenance and human interaction.

Committed to innovation

Dodge products are designed with features to improve reliability and reduce downtime, such as industry-leading patented sealing technology that provides extended life in both harsh duty and washdown applications. Unique mounting systems also make Dodge products easy to install and remove, without shaft damage.

Committed to quality

We rely on our U.S. based, award-winning manufacturing facilities. Our plants utilize world-class manufacturing and logistics processes and materials to ensure quality products and unparalleled support.

Local manufacturing and customer service

Dodge mechanical products are locally manufactured and supported so that we can better take care of you, our customer. Being close means that we can provide the inventory, availability, local sales and support, and personal service our customers have come to expect from us. With the addition of our expansive inventory located across the country, there is not another manufacturer in the world that can better support the U.S. industrial market.

Get products when you need them
