

Dodge® X2000 On-Premise Gateway

Software Release Notes

Version 1.1

The Dodge X2000 On-Premise Gateway v1.1 software is based on the Cassia Networks™ X2000 On-Premise Gateway v0.64 release.

What's New:

- The application version number has been added to the login console
- Dodge logo has been added to the login console

Fixed Issues:

- No historical data was available after the gateway went offline, so the gateway now connects to sensors in range to capture any missing data
- The index problem was resolved

Known Issues:

- The application version number persists after the application or container is deleted or reset
